

# Bioanalysis, LC-MS/MS Laboratory Technician

Job offer

## AnaPath Research

AnaPath Research is a CRO located in Barcelona, with extensive experience in carrying out preclinical trials for pharmaceutical laboratories, the chemical industry and other research organizations. In our more than 30 years of activity we have worked with the main pharmaceutical industries being part of different multinationals (RCC, Harlan and Envigo). In November 2019, AnaPath Services acquired the company and re-founded it as AnaPath Research, thus undertaking together a new project of scientific quality and close contact with new and old sponsors.

With a multidisciplinary team of scientific experts, AnaPath Research covers most fields of preclinical pharmaceutical development and chemical and food safety.

## Analytics & Bioanalytics Unit

The AnaPath bioanalytical team supports the industry R&D projects all the way from drug discovery, through preclinical development and up to the clinical phase. Whether it is method development or routine sample analysis, we are dedicated to providing accurate, reliable and streamlined bioanalytical services for the most challenging programs to help our clients make confident research decisions.

The Analytics & Bioanalytics Unit provides services to regulated bioanalytics by LC-MS/MS and ImmunoAssay platforms. Additionally, we also provide support to the preclinical drug development by performing ADA assessment, flow cytometry and qPCR analysis. Finally, we also assist our toxicology studies by carrying out dose formulation analyses.

## Position

We are looking for a laboratory technician specialized in LC-MS/MS to work in our Analytics & Bioanalytics Unit and to also give support to formulation analysis (HPLC-UV).

## Responsibilities

Collaboration with the study director in development and validation studies of bioanalytical methods for the determination of drugs in biological matrices by LC-MS/MS

Preparation of analytical runs with the objective of quantifying drugs in biological samples by LC-MS/MS according to international guidelines and Standard Operating Procedures

Recording of raw data immediately, truthfully and legibly

Collaboration in the compliance of the Calibration/Maintenance Plan of the laboratory equipment

Performance of the tasks assigned according to the study plans, in line with the quality standards indicated in them

Know and follow Good Laboratory Practice standards and AnaPath Research S.A.U. quality system SOPs when performing activities directly or indirectly related to the studies

## Requirements

Experience in chromatographic techniques and HPLC-UV and LC-MS/MS detection

Certificate of Higher Education (HNC) or equivalent with proven experience in the pharmaceutical industry or similar

English level: intermediate

Previous experience as lab technician in a GLP environment

Immediate start

Own vehicle

## Terms of employment

Indefinite contract

Full-time

Morning work shift
